- Elder, NIS America (\$7.99) Gaming: Of Swords, Sorcerers, and Magic. It seems fitting that for this review on **Abadango**, the retro rogue action RPG **Elder**, should be our first choice, with the action RPG genre being so well represented in recent years by the likes of **Dragon Quest IX** and **Okami**. Back in the ninth century after the Elden and darkness, a druid's daughter is awakened by the ancient scion Altheta, one of the great divinities, and discovers the extent to which the goddess is deeply bonded and connected to the world of our mortal human existence, her true identity. As they explore and try to live a peaceful life together, the goddess slowly reveals a horrifying secret—a warlord has awoken the darkness, and it is ravaging the land. In order for Elder to be successful, it needed to beat the expectations set by previous RPG "imitators," many of whom have failed at creating such a game. First of all, let me just say that Elder is different from the other RPG games. I have to admit, I've been an RPG buff for many years, but I

have never once played an RPG game in which the perspective was tossed between characters and that kind of view never felt right.

In Elder, the perspective is entirely the character's. Of course, the character's ability to see the world works in conjunction with the parts of the game that don't, such as the use of light to navigate the world and other

1. How to change your name
The name of a character must be one word only, and can include letters, numbers, and special characters. The name can be changed during the course of the game, but we ask that if you want to change it for the purposes of entering contests and other competitions, you use the same name for the duration of that competition. The changing of your name will require you to create a new character. In order to do this, you will be required to enter your main name (once it's been changed) and password in the Creation Assistant. The Creation Assistant is to be found in the main menu and can be accessed by pressing Start.
2. Creation Assistant 2.1.
Setting a new username
After selecting the game type (either Online Play or Single-player), and then pressing 'Create' at the bottom of the screen, you will be guided through the creation of a new character. The first thing that you will be shown is the name for the new character. You will need to enter a username, which will be your character's name in the game. The username cannot have any spaces in it. When creating a new character, you will not be asked to enter a password. For the most part, the username will stay the same throughout the course of the game and the characters will not be able to gain experience points or level up. However, you can change your name at any point in the game. When you are asked to create a username, you will be given a set of choices that you can use to give your character a unique role in the game. Please consider what name you would like to use for your character before making your selection, as you will not be able to change the username once your character is created. It is likely that some players who select the same role will want to have a different username. The names shown to you are:
 - Standarder (a name that reflects your character's occupation as a Paladin).
 - Rogue (a name that reflects your character's occupation as a Thief).
 - Armorer (a name that reflects your character's occupation as an Armorer).
 - Mage (a name that reflects your character's occupation as a Wizard).
 - Warrior (a name that reflects your character's occupation
