Note: This is for ELDEN RING PC version, but same appls for ELDEN RING for Android. I like to play games on my PC(I don't have android so can't test it for now), and I have to find a way of applying the option to continue with the previous game. There are 2 things to do: 1. Option to Continue. 2. Use antimalware If you have really good antimalware or a Windows anti-malware, use it. Option to Continue Then open the folder "ELDEN RING PC.exe" and find the "ELDER-RING-LEADER.exe". Make sure you choose the right option or you will end up with a incomplete game. If you don't have antimalware, you might try to: - Open the folder and go into the folder options - click on "replace" in the folder options and choose "yes" - close the folder - reopen the folder options and go to the "ELDEN RING PC.exe" folder and choose "replace" option - select "yes" - close all the folders and go to the folder options and choose "replace" - select "yes" - restart the game. I have some good antimalware, and it is still not working. You should install a good antimalware and try again, maybe the antivirus is blocking the update. Also consider antimalware for your Android. If you still can't find the option to continue, then I don't know why it is not working. Update: Have antimalware and re-tested. I also tested with a different anti-malware and the same result. I am not sure what the problem is, but it**
