"It gives us the ability to put the ball into the right place on the field, to know exactly where the player is when he takes his kick, to know exactly how he's running, to be able to make sure that he's not going past the goalkeeper," said Oliver Bierhoff, FIFA developer at EA Sports, in an interview with Game Informer. These techniques include shooting animations when it is the player's turn to do so, replays that show the exact moment the ball was played, "behind-the-back" shots when a player might sneak in from behind and pass the ball past the goalkeeper, and the heatmap overlay, which accurately shows the position of the ball at any time during the game. "It's the biggest leap in sports-gaming technology that's ever been introduced," said Bierhoff. To ensure that the physics in the game match the real-life physics that is playing out on the field, FIFA 22 added the analogue stick -- which for the first time uses two sticks connected together -- to the game. "The biggest addition has been the use of the analogue stick," said Bierhoff. In the past, developers had used the analog stick to slow down time or to stop a player from running past the opponent or to jump long distances, but in FIFA 22, the stick has been heavily developed for the game. "We do a lot of things with it, [including] doing passes with it," he explained. "When you're making a diagonal run and you want to turn and go with your back to the goalkeeper, you tap the stick away and you start to turn. You can then make the pass. So it's a lot of things that we did with it in the past, but now we have that moment captured." Bierhoff says that the analog stick is a direct introduction to the game, which has been added to suit the needs of casual players as well as the hardcore. "I don't think it's going to make a difference," said Bierhoff. "I think that it's something that is more for the lower end of the fans and I think the casual players are going to use it and it's

#### **What's new:**

- **AI** - controls players more intelligently using tools such as Chalkboards, Punishers, Punishments and Anchors.
- **Assist and Defend** - meaning the team you're playing against will have to make a crucial decision and think on their feet. This will result in your defenders pressing forward - and if they do not return to their position on time - that also gives your attackers the chance to create space and receive a striker's pass.
- **Ball Control** - Passing, dribbling and shooting all link together. A powerful dribble, through a pack of defenders, can bring a goal. In addition, the Ball Control shortcut key allows players to switch quickly from dribbling to looking for a pass.
- **Breaker** - a pack leader that allows the entire team to play from defence to attack freely.
- **Dribble Speed** - Goalkeepers have improved reactions and are more likely to dive and catch the ball before it reaches the back post.
- **Emotions** - Play the way you feel. Create your own emotions and how the game feels for you by setting your strategy and tactics. Add music or silence to your UEFA Champions League or UEFA Europa League match.
- **Exhilaration** - this feeling of pride that comes from scoring a goal against the odds. Enjoy going one-on-one with your rivals, or scoring the first goal in a match. This state of excitement and pure exhilaration increases your rating in the emotion barometer.
- **G-Rates** - For the first time ever FIFA introduced G-Rates. Using the game mechanics introduced in FIFA 21 - such as Memory Cards, Skill Cards, Athletics, Speed, and Stamina - players can now earn achievements linked to their ratings.
- **Human Set Pieces** - Make every shot an opportunity to score in Player Officiating.
- **New Transfer Authenticity System** - As players get increasingly more prestigious and the value of the transfer increases, so does the authenticity of the completed transfer. After the player's services have been terminated, players can take the fee from an incomplete transfer onto the following, completed transfer. Each transfer containing more than one fee will create a "Resale" fee (the difference between the fees) that goes to EA.
- **New Tunnel** - Navigate your way through
