"Galaxy Crash is a space adventure, similar to Elite, that centres around the biggest, deadliest war in human history. The longer this war continues, the more the galaxy's resources will be divided, and the more powerful and invasive Interplanetary Alliance becomes. Everyone is in it for themselves, humanity isn't united and no-one cares, the game tells us, as we watch from the sidelines, if you aren't involved, if you aren't fighting. The game puts you in the shoes of the first person to explore the entire known universe. The player has free reign to explore the galaxy and discover new worlds, meet and interact with a variety of different human factions, even set off on a chain of voracious asteroids known as the Volcanic Armageddon, to meet them in battle!" What's new:

Sluggy Jean Takes a Hike is a Charlie Brown comic strip created by Charles M. Schulz. The first episode was published on September 14, 1960, and aired its first television appearance in 1969 on The Lucy Show and has been syndicated since 1973. Character designer Lynd Ward supplied the design and style for the strip. Background and characters The title character, Sluggy Jean, is a third grade girl from Tree Hill, a small mining community in the mountains of Appalachia. Her family is poor, her father a miner who is often in and out of work and her brother constantly in trouble. Sluggy Jean's mother and father do their best to raise their girl to be a good, hardworking person who would be liked by anyone. As the only girl in the neighborhood, Sluggy Jean naturally takes great pride in being thought of as ugly. Sluggy Jean's meanest enemy is Carl

Schmee. Sluggy Jean, who sometimes acts mean on accident, almost always resorts to saying mean things to Schmee and convincing Mr. Wilson to punish him. Schmee, the opposite of Sluggy Jean, is on a first-name basis with everyone, is very friendly and is liked by many of the residents of Tree Hill, particularly her classmates. It has, on several occasions, been reported that Carl Schmee is a boy, although there are no instances of this occurring. The source of the confusion (which has been perpetuated by Schulz himself, as well as The Peanuts Movie) is two episodes where Sluggy Jean is seen sitting at school with him, talking to him and holding his hand, making it appear as though they're in fact dating. When the two actually speak, however, she calls him Carl. Story background A birthmark on Sluggy Jean's face is the shape of a miniature set of mountain ranges surrounding a spinning top. The spinning top is the town, and the mountain ranges are the surrounding "mountains", much like how in a Star Trek episode, the "command area" is indicated by the letters and numbers of a starship on the table top. The mountains sit on the back of a lazy, red haired girl named Lazy Daisy (whom Sluggy Jean dislikes). In the first episode, the spinning top (unlike the real world, which places the sun in the East, so the tops are always spinning South) is halfway in the sky at the height of a tall tree

Tolerance induction in health care workers handling Legionella pneumophila and protection against an experimental lung infection by a monoclonal antibody. Ten health care workers handling Legionella pneumophila serogroup 1 inhaled a 0.6% monoclonal antibody to the major protective antigen of L. pneumophila (3665) up to 0.1 mg/m³ for 4 hours. They were challenged within 10 days of the last monoclonal antibody exposure. From days 1-4 post challenge, three had an increased antibody titer against the major antigen. Throughout the challenge period, the other health care workers demonstrated a lower but significant increase in antibody titer. The antibody titer remained elevated from 0.2 to 4.0 micrograms/ml. Further challenge exposure was suppressed by a prior exposure of monoclonal antibody to the major protective antigen. These data indicate that this monoclonal antibody may be a potentially useful agent to inhibit reinfection after washing and disinfecting the source of the organism. If health care workers are exposed to L. pneumophila and significant antibody production follows a detoxification protocol is initiated, protection from challenge by the monoclonal antibody may be desirable.⁷²
