spectrometry. A simple and reliable solid-phase extraction (SPE) method coupled with liquid chromatography-tandem mass spectrometry (LC-MS/MS) for the determination of five phenoxy acid herbicides in water samples is described. Before extraction, the water sample was passed through a C(18) cartridge by HPLC. Water was eluted using 2 mL of 1% (v/v) formic acid in methanol. After removal of the cartridge, the target herbicides were eluted with 3 mL of acetonitrile. The limits of detection (LODs) were 0.3-2.2 ng L(-1) and the limits of quantification (LOQs) were 1.0-20.0 ng L(-1). The recoveries of spiked water samples at three concentration levels (2.0, 20.0 and 100 ng L(-1)) varied from 89.8% to 109.2%, with relative standard deviations ranging from 1.2% to 10.2%.

The proposed method was applied for the determination of five phenoxy acid herbicides in environmental water samples. The compounds were found in the river, and were quantified in the range of 0.2-0.8 ng L(-1). The authors suggest that their method may be

## **Elden Ring Crack**

## I really loved the theme of the game. It perfectly suited the genre and did not feel out of place. It felt like a blend of the different elements of fantasy games. This is the first Growlight game I enjoyed very much. The quests, the atmosphere, the music, the landscapes. It was very warm and felt completely natural. I loved it and I couldn't stop playing it.
