Elden Ring PC/Windows [Latest 2022]

●What is the Elden Ring? The Elden Ring is the lifeblood of the world between the Realms of Kaltias and Eldiar, the world where birth-name customs are followed, and magic is in charge. ●The Elden Ring is a premium title developed and published by Dengeki Online Co., Ltd. ●The game is free to play, and the more you play the game, the more you can exchange with your fellows and update the game through you progress. ●You can play the game alone, or with friends via online multiplayer or co-op. ●The "online multiplayer" function allows you to remotely connect with others via the Internet and talk with them through chat. ●As of the battle, if you and your opponent are connected, then you and your opponent can fight together remotely. ●In addition, when you become an Elden Lord, you can communicate with your fellows via the "online multiplayer" function and exchange items freely. ●You can fully enjoy the game without time constraint without game interaction. ●Players can enjoy the game by selecting the battle modes that suit their play style. ●Battle Mode Concept Dynamic Actions By binding positive/negative emotions with a characteristic/line of attack, the synergy between the battle system and your character will change accordingly, and the mode will change from "friendly" to "conflict." When all of your abilities are active, you can put your character's complete strength to the maximum. ●Master the battle tactics of your strength combinations and move freely in the game. Battles Unique battles that change depending on the battle mode. ●When playing the "conflict" mode, a characteristic/line of attack characteristic is used to determine the battle rules. The environment changes dynamically according to the battle rules, and the battle gradually changes. ●When playing the "friend" mode, simply draw a battle line to fight, and suddenly the battle starts. It ends quickly if you and your opponent's lines meet, or if both of you are defeated. Encounter Encounter battles will occur when you repeatedly fight the same opponent. ●In addition to that, in the "friend" mode, you can encounter a party composed of people who are friendly with you, and you can connect with them through online multiplayer. ●Players can also have a cooperative battle in the "conflict" mode, and can even connect with

What's new:

Due to this asynchronous online element, the character will react to the actions of other users in a certain window in time; Your character becomes stronger if its allies are stronger, and takes on the appearance of the other players if defeated in battle. Additionally, the amount of time you spend traveling decreases if you are defeated, which makes it fun in real-time matchmaking. Please note that roles are determined based on the rules in the related news, and a fair battle is not guaranteed.

After the release of the beta, some adjustment may still be needed to the rules. Please refer to the news in the future.
