A friend of mine was having trouble adding screenshots in our Steam overlays, and instead the Steam overlay just displayed a text box that said "Couldn't show screenshot." After looking around, it seems that everyone agrees that the Steam overlay updates at very unpredictable intervals, so it could be hours, days, weeks, etc. before you can see any screenshots in the overlay, so is there a reasonable way of avoiding this? I've tried via automated scripts, but I want something a little more humane. A: I think the most appropriate solution for what you're trying to do would be to use an external screenshot tool like Cyzic's custom tool which allows you to easily set the screenshot location and upload it to your Steam overlay via the screenshot button: Lincoln Kennedy Lincoln Kennedy (born July 11, 1971) is a former American football linebacker who played two seasons with the Miami Dolphins of the National Football League.
