Hi everyone, I thought I'd introduce myself as the lead developer on the branch, for anyone who might be wondering about our progress or what the team is up to. (and because I have been living under a rock for the past 2 years). The Greenlight tracker now has new data for April, showing a huge increase in the number of people who have shown interest in the project. We also have some statistics for the game itself (and showing that Greenlight users are extremely active!) In addition, we have fixed the issue that was causing the game to crash for many Greenlight users, after the "Early Access" transition. This will resolve crashes for anyone who installed the game before the transition, by making sure that they always show up in greenlight. While we hope that you all enjoy playing the game now, we are still looking forward to hearing from everyone as we continue our development. You can find us on our social media pages and IRC. Stay tuned for news!

[Practice guideline: idiopathic pericardial effusion in children]. A French study group on behalf of the French Pediatric Cardiology Society (SFRPPC) developed this article on the

diagnosis and treatment of idiopathic pericardial effusion in children and adolescents. This paper reports the results of an initial review of French pediatric practice and a survey of literature published on idiopathic pericardial effusion in children. Fifteen-hundred questionnaires were sent to
