It is set in a world where people have been driven mad by their love for someone else. Become the sort of person who can manipulate minds and influence people's emotions. In other words, play as the psychopath. Try and make every woman in town love you. The more you kill, the more twisted the game gets. The more perverse your actions, the higher the ratings you get! Kill off as many people as you can and enjoy them being turned into your sex slaves! Will you manage to escape or will the madness consume you too? Just as you commit a murder, your friends could be your witnesses! Avoid being observed or arrested! You can choose to play as a boy or a girl. If you're a boy, you'll have to seduce your best friend who loves you. If you're a girl, you'll have to be cute and date the boy who tries to kill you. In a future world with a completely different past, ordinary teenagers live relatively normal lives. They are in school, they study and they have friends. Occasionally, they write letters or meet with their friends. But they don't know what awaits them. It's possible that their normal, everyday life is only a preparation for something more difficult, more dark and more mysterious. A secret is being kept in a separate, special place called the "Dark Space". Every time the "Dark Space" is summoned, it can transport you to an entirely different world. But this time it will be different – something strange has happened. There is a note from the future, it says that one of you will become a monster. Only one of you can survive, the others will die. The time is now to decide. You can take a different path, or try to save your friends from the fate that awaits them. The Dark Side Activation Code started as a demo for our fans of visual novels, but we decided to turn it into a complete game. Now the full version of the visual novel is ready for purchase, and we hope you will love it as much as we have loved making it. ... Apple is reportedly preparing a cheaper iPad Mini with the 4th generation chipset and improved specs for the same price as the iPad Air 2. 'Channel' News has revealed that Apple's contract manufacturing partner Largan Precision will be producing the iPad Mini at a low cost which will allow it to be priced at Rs. 32,000 (approx. $500). This is in line with the rumored prices for a new iPad Mini, which would see an Apple-branded entry-level model being available for Rs. 32,000 while a higher-end model with the A9 processor, 4GB RAM, and LTE connectivity would be priced at Rs. 39,000 (approx. $700). While the iPad Mini will not be getting an enhanced display compared to the 4th generation iPad, Apple is reportedly preparing a Retina Display "for the entry level device", which will see it priced at Rs. 42,000 (approx. $700). This is an indication of what we can expect to see in the entry-level version of the iPad Mini. While the above prices are not official, it is likely that the 4th generation iPad Mini will be priced at an even lower price than the entry-level model. of the Moon Welcome back, travelers! Today we have more from the forthcoming release of my book The Dark Side of the Moon – featuring new artwork, new content, and many new illustrations, sketches, and diagrams to be unveiled on a monthly basis. My assistant Jona has been hard at work, getting all the illustrations just right, and I'm excited to see how this process unfolds. I'm happy to report that the updated version of the book cover was chosen by my daughter Amelia, and it totally fits the material! Let me know what you think in the comments. And if you are curious about the book itself, with its puns, thoughtful illustrations, and analysis, you can see my little statement and list of recommendations HERE. Stay tuned for fun updates on the release of the book. I expect to have several ways you can read and enjoy it online as well as for sale. I'm still working out the details of that. Almost finished With time to spare at last now (though there's less than a week to go) And a minute to kill (though that may go…) I've been making plans For a brand-new muddled old day With time to spare at last now I look forward to the muddle that this day brings And so I say (though I'm not sure) it's a new day it's a new day, free of you! Did You see us? Or did we elude You? We are muddled, but we're not confused That's the key we'll keep holding fast I'll get into the muddle in due time (i'll have it all changed) Unless I need you to clear up my mind Or to give me back what's gone wrong And then I'll be a happy man From that very moment On! But though you're happy now, though you're happy now, free of me There's still a new dark side to the moon – Frederick Douglass, Morte Mhymn, and Baltasar Linero Wrote And The Blue Danube Waltz to the melody of Vieni, Vieni (Besame Mucho) Defying gravity And rising to the fierce beat of the drum There is no new dark side to the moon And your new day has more space (all for you) And I congratulate you I'
