## Run Psexec.exe For List Of Computers Stored In Text file

. To run the PSEXEC.EXE a few months ago. This tutorial will show you how to install and set up PyProxy for Windows. Your computer's IP address. If you do not know what this is, it is likely that you have been hacked. How to know which computer's IP address you are currently using.Q:

How do I read an RTF file with the help of RTF.NET? I'm using RTF.NET and I need to store information from RTF files in my database. Afterwards I need to render them to PDF, like Word and Word's save to PDF. RTF.NET is my plan, but how do I read the rtf files? I tried to use: // Here's a nice example for reading RTF files `var rtf = System.IO.File.ReadAllText("/home/dir/file.rtf");` Which is not working. "r" is not a recognized RTF constant Do you have any ideas? EDIT: I use the `System.IO.File.ReadAllBytes` By the way this is not working, although I cannot find any errors in the other website. `var rtfStream = new MemoryStream(); var bytes = File.ReadAllBytes("/home/dir/file.rtf"); using (StreamReader reader = new StreamReader(bytes, Encoding.UTF8)) { rtfStream.Write(Encoding.UTF8.GetBytes(reader.ReadToEnd()), 0, bytes.Length); } var rtfByteArray = rtfStream.ToArray();` EDIT: As @Ron said RTF.NET works with rtf data with encoding. I tried to follow his answer with this code: `var rtfByteArray = File.ReadAllBytes("/home/dir/file.rtf"); var rtfStream = new MemoryStream(); using (var reader = new StreamReader(rtfByteArray, Encoding.UTF8)) { rtfStream.Write(Encoding.UTF8.GetBytes(reader.ReadToEnd()), 0, bytes.Length); } var rtfByteArray = rtfStream.ToArray();` But it 6d1f23a050
