MAXAGENT Fitgirl Repack Impact
of YAP1 Gene Hypermethylation
on Significance of Lymph Node
Metastasis in Patients with Lung
Cancer. Recently, the
hypermethylation of YAP1 (yes-

associated protein 1) in lung cancer has been found to be a promising biomarker for predicting lymph node metastasis (LNM). The aim of this study is to explore the role of YAP1 gene methylation in LNM of lung cancer in the Chinese population. The methylation status of YAP1 gene was detected by methylation-specific polymerase chain reaction in the pathological specimens of 157 patients with lung cancer. The relationship between YAP1 gene methylation and the clinicopathological

features of patients with lung cancer were analyzed statistically. Univariate and multivariate logistic regression analyses were conducted to determine the risk factors of LNM. In the univariate analysis, the percentage of YAP1 methylation was significantly increased in the LNM group compared to the non-metastasis (NM) group (Pindia Updated: Jan 11, 2019 23:14 IST In an order dated December 6, 2017, the Central Bureau of Investigation (CBI) in its first investigation into the 2015 Kejriwal government's

graft against Delhi chief minister Arvind Kejriwal in the purchase of vegetables from Gujarat, ruled out bribery as the main cause of the Delhi government's loss. In the order, the CBI wrote that "It is difficult to accept that the purchase amount was changed on the basis of the 6d1f23a050
