files in a folder while
preserving all their
properties How can I delete
all files in a folder while
preserving all their
properties like sizes and
```

timestamp. When I use this command there are many errors that I don't

understand. find. -type f
-exec chmod 4755 {} \;

Thank you A: You probably want to use a find command like: find /path/to/dir -depth -type f -exec chmod 4755 {} \;

Once you're done you can use the -delete switch to permanently delete the files

from the current directory:
find /path/to/dir -depth -type
f -exec chmod 4755 {} \;
-delete -depth indicates the
depth of the recursion. -type
f indicates only look for files
(not directories). References

The Command Line How
does find work? How to list
files and directories recurs
