## Architectural Graphic Standards CDROM Version 30

second-year course that aims to provide students with the necessary linguistic and cultural background necessary to enter into a more advanced arab or hebrew unit of study. the course will cover a broad range of language topics, with a particular focus on the language of israel, its history, culture, politics, literature, and the bible. we will explore the dialects spoken in israel, the need to identify and describe the colloquial and the normative varieties of a language and the relationship between language and cultural identification. we will also consider the role of language in issues of nationalism, media, popular culture, power and identity in the middle eastern context. throughout the course, students will be required to make short presentations, write reaction essays, lead discussion on chosen topics, take a midterm exam and write a final term paper. although some background in one of the two languages, their history and their geographic and social settings would be advantageous, the course will neither assume nor require any prior background. the seminar will carry 4 credits. minimum system configuration: processor: ibm compatible pc 486dx/33 memory: 24 mb disk space: 1.5 mb cd rom : single speed mouse: yes screen resolution: 800 x 600 x 256 colors recommended system configuration processor: ibm compatible pentium pc 266 or faster memory: 32 mb disk space: 1.5 mb cd rom: 20x or faster mouse: yes screen resolution: 1024 x 758 x 16 bit color netscape 4.0 (or later) or internet explorer 4.0 (or later) is required for use of industry links and web features. copyright information \*masterspec is a registered trademark of the american institute of architects. \*\*masterformat is a joint publication of the construction specifications institute (csi) and construction specifications canada (csc) and is used with permission. \*\*\*architects' first source for products is a comprehensive directory of commercial building product manufacturers- both in print and on the internet. architectural graphic standards cd-rom version 3.0 developed by jordani multimedia and published by john wiley & sons, inc. ramsey/sleeper architectural graphic standards, tenth edition. prepared by the american institute of architects. edited by john ray hoke, jr., faia. microstation is a registered trademark of bentley systems, inc. autocad 2000 is a registered trademark of autodesk, inc. 2000 john wiley & sons, inc. 5ec8ef588b
