we are about to create the best radio we can. we will make sure the radio is built to last. this is the first ever. this is a community project aimed at building our own radio. we aim to take the expertise that weve gained from the construction of previous radios and build the n.w.l. with it. donations to the radio fund are welcome and appreciated. your money and effort will go directly to the end product. lets make a radio built with passion, knowledge, experience and brains. lets start a good project, that will be our legacy. lets do it for the country, for the people we love, our community, our country, and our planet earth. lets make something that is worthy of being placed in history books. if you are located at the right entrance, the first thing you can do is reach bomb site a from the inside. use the door to reach the cellar. there are three enemies and a team member at the front. moving through the cellar, youll find two terrorists in a side room facing you. your best option is to try and run around them from the back of the cellar. its hard to judge your success due to the wall, but if you are able to get through the line of enemies, you have a good chance at destroying the bomb. the opening between rooms is a good place to get a good vantage point, perfect for a sniper. with a little luck you will destroy the bomb and be rewarded. this method may be easier when you have a sniper rifle and added support, and on a normal map (because there are only 2 enemies at the front). you may be able to find a way to flank bomb site a. finding a stick is a lot easier. theyre scattered around the entire map. theres a small garden in the middle with an old women statue on it. along the side walls, there are windows and doors. as you move through the garden, youll find 3-4 windows, and a door. you can also find an ammo box and other supplies here. the garden has a few spider holes and hidden rooms. to find the stick, move to the side garden and find the vines. if you can climb over the vines and step into the hidden door, youre near the stick. the stick is in a room covered in rubble. from the other side, press w to jump over the vines and crawl through the room.

from the ground is the center of this mission area. this is a key area where the ct should position to have their teammates collect the explosive items from a team member. this is usually a molotov or a dragon in grenade form. the reward is the flashbangs and trees. in some of the scenarios the explosion comes as a surprise, although a teammate may carry a grenade. collect the items quickly to avoid being spotted by the terrorists in the western garden, and when you know that the ct is getting near your position, make a dash for it. 5ec8ef588b
