The battleship Missouri launched a string of attack on Pearl Harbor on 7 December 1941. A great naval victory for the United States, the Missouri was severely damaged at the Battle of the Santa Cruz Islands. She took refuge in Pearl Harbor where she was used as a military prison before being decommissioned in 1946. Still visible at Pearl Harbor today, the Missouri's impressive size,

her superstructure, and her impressive array of guns has caused her to become a landmark and a symbol of the strength of the American Navy. This powerful graphics screensaver lets you visit and explore this legendary ship. Battle ships are very impressive on the surface, with their imposing superstructure and massive guns, but the Missouri takes it to a whole new level. She is not only a ship, but a piece of history, and you have the chance to visit her, on your desktop, in 3D!
