When minimized, the program will change to a primary taskbar icon, and when maximized, it will appear in the system tray. - Resize, compress or move any window on the desktop - Resize, compress or move windows in the taskbar - System tray integration: Integrate the selected program with the system tray. When minimized, the program will change to a primary taskbar icon, and when maximized, it will appear in the system tray. - System tray integration: Integrate the selected program with the system tray. When minimized, the program will change to a primary taskbar icon, and when maximized, it will appear in the system tray. - Window tiling or docking - Additional features: - System tray integration: Integrate the selected program 2edc1e01e8

## RBTray

RBTray is a small Windows application whose purpose is to help you minimize windows in the system tray area using straightforward actions. Installation tweaks The utility can be deployed on 32- and 63-bit operating systems and you can pick the preferred one from the installation package. It does not come with support for a built-in option that could help you run the program at Windows startup so you need to manually create a shortcut to the executable file in your Start menu folder. How it works RBTray does not help you minimize windows via a GUI. It actually runs in the background without interfering with your work. The application gives you the possibility to send any program to the system tray by simply performing a right-click on the minimize button. In order to restore the target utility, you need to press a single left click on the tray icon. In case you want to close RBTray, this option is available by right-clicking on a minimized window in the system tray. Aside from terminating the program, you can close or restore the current window. The tool is also able to make the selected panel remain on top of others using preset keyboard shortcuts (Win-T). Tests have shown that RBTray carries out a task very quickly and without errors. It doesn't eat up a lot of CPU and memory so the overall performance of the system is not hampered. Bottom line All things considered, RBTray delivers a simplistic approach for helping you minimize windows using right-clicks. The intuitive feature pack makes it suitable for rookies and professionals alike. RBTray in Software Center: RBTray in Software library: RBTray in Google: RBTray in Amazon: RBTray in Windows Software: RBTray for Windows is a small utility that helps you minimize windows with the push of a button. Unlike the common windows menu, RBTray works by holding the button down while right clicking on the minimized window. The minimized window will immediately return to the desktop upon releasing the button. It does not interfere with your work and can be used as an easy shortcut to minimize windows. How it works RBTray is a very simple

## What's New in the RBTray?

===== Like RNotify, RBTray is a fork of Nikolay Redko's app with the same name and has the role of enabling you to minimize windows that otherwise do not have this function. The application does not have an interface, but rather it works as a service in the background. Nevertheless, the role of the tool is to help you have a clutter-free desktop where you can find important shortcuts for the apps you are regularly using. To get started, simply decompress the archive in the desired location - preferably in Program Files - and double click the executable. According to the developer, the tool can be configured to automatically start with Windows, but for this it is necessary to create a shortcut for it in the Start Menu group. The application allows the minimization of windows via this method, namely using the Minimize button, Windows-Alt-Down key combination or Shift-Right-Click. It is important to note that depending on the application, you may need to employ any of the aforementioned methods to minimize the program's window. Restoring the minimized program is a straightforward process that entails looking for the said program in the System Tray and right clicking on its icon. Exiting the app can be done by ending the process in the Task Manager. ===== Amit Kumar ===== RBTray 0.1.0.12 Finnish: ===== Amit Kumar ===== RBTray 0.1.0.12 Croatian: ===== Amit Kumar ===== RBTray 0.1.0.12 German: ===== Amit Kumar ===== RBTray 0.1.0.12 Portuguese: ===== Amit Kumar ===== RBTray 0.1.0.12 Polish: ===== Amit Kumar ===== RBTray 0.1.0.12 Spanish: ===== Amit Kumar ===== RBTray 0.1.0.12 Italian: ===== Amit Kumar ===== RBTray 0.1.0.12 Czech: ===== Amit Kumar ===== RBTray 0.1.0.12 Portuguese: =====
