Hillary Clinton broke a significant milestone during a rally in New Hampshire Wednesday when she became the first major candidate to draw 100,000 unique campaign contributors to her campaign. With some exceptions, Donald Trump and Bernie Sanders have done well with small donors. But Clinton is hoping the more than 100,000 unique donors give her the financial edge. The milestone means that Hillary has the 2nd most donors on the books, only trailing Donald. Read more... (AP Photo/Keith Srakocic) Obama On Defense: If Barack Obama is looking to play defense in his upcoming foreign policy speech, he's in luck. The most-watched clip that's leaked so far from the president's remarks is of him saying he "inherited a mess" from Bush. President Obama is going to speak at West Point Tuesday night, it was announced on Friday. The president's remarks are expected to be both a defense of his own foreign policy and a push for continued strength in U.S. military capabilities. Vice President Biden will be among those delivering opening remarks at the address, which is being viewed as Obama's final one before he leaves office. The president is scheduled to leave the White House on Jan. 20. Read more... (AP Photo/Andrew Harnik) Bernie Sanders: Bernie Sanders wrote a letter to President Barack Obama demanding he direct the National Security Agency to release the number of U.S. persons that have been spied on. The Vermont senator's staff sent the letter on Friday and it was signed by Sanders, his top campaign aides and a former Sanders adviser. Sanders wrote that he is "deeply concerned" about the "number of Americans who have been killed and the number of other Americans who have been subjected to the most unconstitutional mass surveillance in history." The letter also says the Senate "should hold hearings to expose the number of innocent Americans who have been spied on." Read more... Unit Measurement Converter is a lightweight and straightforward tool with a pretty self-explanatory name - it allows you to convert values from one measurement unit to another. This is a portable product, so installing Unit Measurement Converter is not required. It means that you can save the tool to a removable device and directly run its executable file on any computer. In addition, the Windows Registry is not updated with new entries, and no leftover files can be found after program removal. Also, you can carry Unit Measurement Converter with you whenever you're on the move. The app is wrapped in a plain interface where you can easily navigate. So, all you have to do is select the measurement category (e.g. mass, force, temperature, angle), along with the source and output unit (e.g. Newton, square meter, knots). Once you input the quantity value, Unit Measurement Converter automatically calculates and displays the result. Furthermore, it allows you to access Windows' Calculator directly from the main frame. The simple-to-use program runs on a very low amount of CPU and system memory, has a good response time and immediately makes the necessary calculations. We have not encountered any issues during our tests; Unit Measurement Converter did not freeze, crash or pop up error dialogs. Some improvements are welcomed in the visual department. Other than that, inexperienced users can easily learn how to work with this app, thanks to Unit Measurement Converter's intuitive layout. Units is a conversion app for Windows.
