Additionally, brush enhancements, including the new Select and Delete tool, are built into more precise and intelligent Select mode brushes to provide a greater level of control over selections. The Excavator brush gains the ability to easily remove selected objects from images, such as pixels, and other shapes, such as lines or curves. The Invert and Mirror tools can also be used to contain the selected content to a specific area of the image. The new Delete and Fill tool in Photoshop enables users to quickly and easily remove or replace objects in an image with just a single action. A single action means one click, no need to re-do selected items, make selections and delete the objects you marked, all in one step. This eliminates the daunting process of having to delete objects one at a time, making Photoshop the most versatile image editing tool. "Our users are always asking for ways to make Photoshop and their own creative workflow easier, which is why we're always working to bring advanced image editing features to Photoshop," said Michael Gissing, vice president and general manager of Adobe Photoshop. "The most important thing is to make sure they deliver the innovation they've been asking for, so we're thrilled to announce these new breakthrough collaborative features."
